PROFESSIONAL SUMMARY

Final-year Software Engineering (IoT) student with an Honours Control Systems diploma and 16 months of Industrial Automation experience at CIMCO Refrigeration. Hands-on experience in Python, C#/.NET, PLC/BACnet systems, software testing, troubleshooting, Linux and Microsoft Azure, with interests in software, cloud/DevOps, IoT/edge and automation engineering.

TECHNICAL SKILLS

Programming: Python, C, C++, C#, Java, Bash, SQL, HTML/CSS/JavaScript

Cloud / Azure: Azure Virtual Machines, VNet/NSG, Azure Monitor, Azure Monitor Agent, Data Collection Rules, Log Analytics, KQL, Blob Storage, RBAC, Cost Management, Linux/Ubuntu, Git/GitHub

DevOps - Basic Knowledge: Docker, Kubernetes, Terraform, Ansible, Jenkins, CI/CD, GitOps

Automation / Systems: Studio 5000, RSLogix 500/5000, FactoryTalk View, RSLinx/FT Linx, Allen-Bradley PLC/Flex I/O, Delta Controls, BACnet, enteliWEB, OrcaView

Development / Tools: Visual Studio, VS Code, .NET, OpenCV, MySQL/SQLite, Jira, Microsoft Office, AutoCAD Electrical (beginner)

PROFESSIONAL EXPERIENCE

Automation Co-op Student | CIMCO Refrigeration (Toromont), Burlington, ON

May 2025 - Aug 2026

- Developed and maintained Python/OpenCV thermal-monitoring software integrating Optris thermal cameras, application-health monitoring and BACnet-related functionality for industrial systems.
- Built and supported a C#/.NET Windows watchdog service that monitored application instances and automated recovery/startup behavior to improve system reliability.
- Tested automation panels/packages, PLC I/O, HMI/control functionality and networking; reproduced issues, validated fixes, performed upgrades and supported customer-site deployments.
- Supported Allen-Bradley and Delta Controls environments using Studio 5000, FactoryTalk, BACnet, enteliWEB and OrcaView, troubleshooting controller, I/O and communication issues.

Electrical Assembler | Brampton Engineering

June 2022 - Sep 2022

- Performed electrical panel and machine wiring to drawings/specifications while supporting quality checks and troubleshooting.

Assembler | Powersmith

Mar 2022 - Jun 2022

- Assembled battery backup units and power distribution components to technical specifications, supporting product quality, precision, and reliable electrical assembly.

SELECTED PROJECTS

Azure IoT Monitoring System | Azure, Python, Linux, KQL, Git [Github](#)

- Built and deployed a Python-based IoT telemetry simulator on an Azure Ubuntu VM, generating light, sound, distance and device-alert data and running persistently through systemd.
- Implemented cloud monitoring and centralized Linux logging using Azure Monitor, Azure Monitor Agent, Data Collection Rules, Log Analytics and KQL, with CPU threshold alerts and email notifications.
- Configured Azure Blob Storage for telemetry archival and applied VNet/NSG controls, SSH key authentication, Azure RBAC, private storage, resource tagging and Azure Cost Management budget controls.

Autonomous Mission Control Agent for Self-Healing IoT Satellites | Capstone - In Progress

- Developing an edge-to-cloud IoT system for autonomous anomaly detection and recovery using satellite telemetry, machine learning, and a ground-station/cloud architecture.
- Exploring TensorFlow Lite autoencoders for telemetry anomaly detection, finite-state-machine (FSM) recovery actions, MQTT/TLS communication, Azure IoT services, and embedded edge computing for autonomous monitoring and response.

Bank Management System | C++ [Github](#)

- Developed a C++ console application for account creation, deposits, withdrawals, balance checks and account updates with PIN validation and structured input validation.

Finance Tracker | Java [Github](#)

- Built a Java command-line application for user accounts, income/expense tracking and transaction history with input validation and object-oriented class design.

EDUCATION

B.Eng. Software Engineering (IoT Stream) | Ontario Tech University

Expected May 2027

GPA: 3.24

Electrical Engineering Technician - Control Systems, Honours Diploma | Humber College

May 2019

GPA: 3.4

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Microsoft Azure Fundamentals (AZ-900) - currently preparing | **DevOps Fundamentals** - currently learning | **C++ Programming - Certificate** | **MySQL Database - Certificate** | **Seize the Moment: Software Development - Certificate**
